

Emergency equipment is available in three different versions:

1 Rescue Cabinet

Complete equipment despite small dimensions - the compact rescue cabinet is small enough to fit into every control room and hangar.

2 Rescue Box

Mobility and flexibility - that is what is outstanding about this rolling rescue box. All equipment can be transported at once if there is an incident which saves valuable time. It is available with or without fire extinguisher.

3 Rescue Board

Easy access and quick recognition of the equipment that is required - the rescue board provides the best possible accessibility.

Rescue Equipment

All available versions are equipped with the prescribed components and can be extended on customer request.

Design of our rescue equipment boards, boxes and cabinets can be adapted to your local conditions by choosing individual sizes, colors and equipment.
